

KM PCL Barcode Flash

► flexible and cost effective
barcode printing

▶ The barcode printing challenge: winning efficiency

Barcodes have become an essential tool for business, delivering dramatic increases in workflow efficiency. But just as efficiency is vital to a successful workflow, efficiency in the printing process is essential to using barcodes profitably. Successful barcode printing places intense demands on printing resources: print runs can be long, toner consumption is high and print quality has to be uncompromising. You need to know your equipment will perform with minimum downtime, maximum reliability and as cost-effectively as possible.

▶ The Kyocera advantage

With Kyocera, your barcode printing becomes more cost-effective and flexible than ever before. The proven quality of Kyocera's long-life components means that charges for consumables are consistently lower than any other competing system. Kyocera's class-leading total cost of ownership (TCO) and long-life components mean that even high-volume print jobs can be completed with a minimum of expenditure and maintenance. And thanks to KM PCL Barcode Flash, you can now exploit the Kyocera advantage for barcode printing even in pure PCL based environment.

▶ How KM PCL Barcode Flash can enhance your business

With its outstanding flexibility and cross-platform effectiveness, the KM PCL Barcode Flash feature helps you reduce your expenditure on barcode printing by giving you access to the unbeatably low cost-per-page of Kyocera printers and multi-functional systems. Here are just a few examples of what KM PCL Barcode Flash can do for you:

- ▶ Enhance the efficiency of your warehousing and distribution by exploiting barcode systems to trace every item, without overspending on barcode printing.
- ▶ Save time and money by using machine-readable fonts (such as OCR-A, OCR-B) on freight papers and circulation-documents which can be scanned and digitised fast and easily.
- ▶ Enhance the effectiveness of your book-keeping resources by printing account information directly on invoices using data-rich 2D barcodes. Simply scan the barcode to access key information immediately.

► The key to success: Kyocera PCL Barcode Flash

Kyocera PCL Barcode Flash expands the proven PRESCRIBE barcode printing capabilities of Kyocera printers and multi-functional systems with an extensive set of additional PCL-based barcodes. With 45 one-dimensional and two dimensional fonts, the KM PCL Barcode Flash boosts the flexibility of your barcode print applications, and lets you exploit the low total cost of ownership and reliability of Kyocera printers for all your barcode printing requirements.

1-dimensional Barcode

2-dimensional Barcode

CUSTOMISE YOUR SERVICE, NOT YOUR PRINTERS

Even if your barcode printing applications are customised for PCL, the KM PCL Barcode Flash lets you use Kyocera printers to deliver reliable barcode printing at a fraction of the cost-per-page of other printers - without the need for re-customisation. Discover a new level of flexible, cost-effective barcode printing with KM PCL Barcode Flash.

SUPERIOR FLEXIBILITY

Thanks to its Compact Flash card format, KM PCL Barcode Flash can be used with any Kyocera printer or multi-functional equipped with a Compact Flash slot, giving you the freedom to spontaneously decide if you want to print to your desktop printer or high-end multi-functional system. Even in the unlikely event of a failure in your primary barcode printer, you can simply move the KM PCL Barcode Flash card to another printer and continue the barcode print job. Minimum downtime, maximum efficiency: the KM PCL Barcode Flash gives you the winning edge for your barcode printing.

SMALL SIZE, BIG ABILITIES

In addition to a wide range of 1-dimensional and 2-dimensional fonts*, KM PCL Barcode Flash includes additional fonts such as OCR-A and OCR-B as standard. And thanks to its integrated memory capacity, forms and templates can be stored directly on the card itself. Documents can be printed directly at the printer – without the need for a PC.

* The 2-dimensional symbologies are also available when using PRESCRIBE.

▶ KM PCL Barcode Flash Features

- ▶ KM PCL Barcode Flash adds PCL barcode features to Kyocera printers and multi-functional systems, meeting the requirements of general industry standards
- ▶ The software is delivered on a Compact Flash card. It can be run with all Kyocera printers and multi-functional devices equipped with optional print controller which are capable of Compact Flash cards
- ▶ Contains 45 one and two-dimensional barcodes including OCR-A and OCR-B fonts. All fonts are also accessible when using PRESCRIBE
- ▶ Minimum 16 MB RAM recommended
- ▶ License not hardware-related: KM PCL Barcode Flash can be exchanged between different KM printers and multi-functional systems.
