DOCUMENT OUTPUT MANAGEMENT

SPREADING **INFORMATION**  
WITH ONE **EASY CLICK.**

 **KYOCERA**

# THE ONE-CLICK DOCUMENT DISTRIBUTION.

KYOeasyprint 2.0 simplifies all routine document output workflows. Designed for small to medium-sized businesses, this software will increase productivity by turning even the most complex printing routine into a one-click operation.

## MAKING DOCUMENT OUTPUT FAST AND EASY

Administrative workflows often require a single document to be sent to different departments, often with different settings. Managing these processes manually costs time and is prone to error.

KYOeasyprint 2.0 automates complex document output workflows.

A single click can simultaneously

- ▶ send the document to different devices in different departments;
- ▶ have copies printed from various printer trays for various qualities and/or sizes of paper;
- ▶ use different finishing options for each copy (e.g. stapling, punching, n-up, etc.);
- ▶ print out copies with different watermarks, form underlays or insert pages;
- ▶ send the document straight to a fax machine, or archive the document on your server.

## AN EASY STEP FORWARD IN OFFICE EFFICIENCY

Processing office document workflows without delays speeds up the administrative process, increasing efficiency and lowering administrative costs.

Examples of use:

▶ **INVOICE PRINTING:** Distribute invoices to all recipients in one simple step.

**Example:** The customer's invoice is printed on premium company stationery and includes the terms & conditions on the back. At the same time, one copy is sent directly to the accounting department, marked with a COPY watermark, one is printed out in the controlling department and one is automatically archived as a PDF file.

▶ **MULTIPLE STATIONERY:** Print a document on different kinds of paper and with different letterheads.

**Example:** Companies which distribute various brands or offer multiple services require a variety of stationery with different letterheads. KYOeasyprint 2.0 automatically inserts the required electronic letterhead into any type of document so that managing different letterheads is quick, easy and fail-safe.

▶ **COPY PRINTING:** Automatically create as many duplicates as you need.

**Example:** All copies of a document can be printed on one or multiple printers. Copies are automatically watermarked or printed on special paper, and additional forms or text can be included.

## COUNT ON US

As one of the leading manufacturers of office document solutions, KYOCERA is committed to delivering consistently high-quality products and services. We not only provide you with the most reliable hardware and software, but also offer exceptional service, comprehensive consulting and tailor-made financing. And even if you may never need it, KYOeasyprint 2.0 comes with a 1-year professional KYOsupport package, for fast help. Whatever your needs – you can count on us. Want to know more? Simply get in touch with your local KYOCERA Business Partner.

**SYSTEM REQUIREMENTS**

Pentium® III, min. 800 MHz, 256 MB RAM, 500 MB free hard disk space, USB interface.

**Operating systems:**

Windows® 2000, 2000 Professional, XP, XP Professional, Vista, 2000 or 2003 SP2 Server.

Internet Explorer 6.0 or higher required.

**Supported devices and technologies:**

KYOeasyprint 2.0 supports Windows-based print devices, such as laser printers, fax printers, TIF printers and PDF printers, plus all virtual printers available on the Windows® host system as printer objects.
